WORK EXPERIENCE

Software Developer Intern | Turtle Software Pvt. Ltd.

Pune, India | January, 2026 - Feb, 2026

- Integrated PhonePe payment gateway APIs and implemented multi-tenant barcode generation for unique product identification.
- Developed responsive React (MUI v6) UI, improving mobile engagement across devices.
- Built and deployed the Terrapin Revenue Platform, a multi-tenant React Native (Expo) app featuring secure authentication, deep-link routing, and a WebView cockpit, published on Google Play Store and Apple App Store.
- **Implemented** deep-link and QR-based tenant routing, resolving iOS WebView session persistence issues.

Frontend Development Intern | Inovite ([Inovite](#))

Pune, India (Remote) | August, 2025 - Dec, 2025

- **Developed** majority of React-based frontend for company's migration from Django, enabling future mobile app integration.
- Engineered a **multi-language translation feature** using **React-i18next**, implementing a dynamic language selector to enhance accessibility for global users
- Built responsive Product Details and Contact pages for Nazario eyewear, improving cross-device UX.
- Improved site performance by **15%** via reusable components, React Hooks, and optimized state management.
- Contributed to agile cycles, code reviews, and cross-team collaboration; reduced future dev time by 25%.

PROJECTS

TracksFlick – Movie Search & Watchlist App | React.js, JavaScript(ES6), OMDb API, LocalStorage

[Live](#)

- Built SPA using React with custom hooks for API handling and keyboard interaction.
- Integrated OMDb API for dynamic movie search and detail rendering.
- Implemented a persistent watchlist using localStorage and designed a responsive, component-based UI architecture.

Done. – Task Management Application | React.js, Node.js, Express.js, MongoDB, JWT

[Live](#)

- Developed a full-stack task management platform with secure authentication, task CRUD operations, and personalized user dashboards.
- Implemented search, filtering, status tracking, and pagination, enabling efficient management of large task collections.
- Designed a responsive and modern React interface with reusable components, improving usability across desktop and mobile devices.

TravelPlannerAI | React.js, Node.js, Express.js, MongoDB, Gemini AI

[Live](#)

- Built an AI-powered travel itinerary generator that extracts booking information from PDFs and images using Gemini AI and automatically creates structured trip plans.
- Developed secure authentication with JWT access/refresh tokens and implemented itinerary management with persistent storage and user-specific dashboards.
- Enabled one-click itinerary sharing through unique public links and designed an interactive day-wise travel timeline featuring flights, hotels, transport, meals, and activities.

TECHNICAL SKILLS

Programming Language: Java, JavaScript, TypeScript(basic), Ejs, Ruby(basics)

Frontend: React.js, Angular(basic), HTML5, CSS3, MUI, Bootstrap

Mobile Application: React Native

Backend: Node.js, Express.js, Django, REST APIs, JWT

Databases: MySQL, MongoDB

Tools & Workflow: Git, GitHub, AWS(EC2, S3, IAM - basic knowledge), Webpack/Vite (familiar), Agile methodologies

EDUCATION

Bachelor of Engineering in CSE

College of Engineering and Technology, Akola

CGPA: 7.51

2020 - 2024

Akola
